

Training Guide

Description of MyClyns™

A patent-pending new standard of instant personal protection, in the field, for those exposed to potentially harmful pathogens.

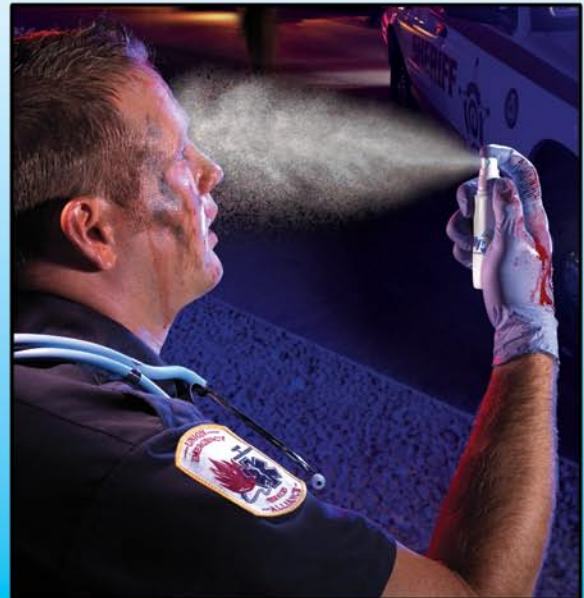

Safe to use on mucous membranes. The only first response protection that can be sprayed directly onto the face and into the eyes, ears, mouth, nose and, open wounds.

When to use MyClyns™

Use immediately when personnel are exposed to:

- Blood
- Saliva
- Vomit
- Mucous
- Feces/Urine
- Other pathogens through coughing or wounds

- *Not recommended for use as a routine hand sanitizer.*
- *MyClyns does not replace other standard post-exposure procedures. You should utilize post-exposure protocols as required.*
