

Boat Pintle Weapon Systems

For more than a century, FN Herstal has designed and manufactured small caliber weapons and ammunition adopted by a large number of countries worldwide. Facing great success and having gained long-standing experience in small caliber weapons, FN Herstal started to expand its product portfolio by developing and manufacturing integrated weapon systems for installation onto or into major vehicle or vessel types.

More than just selling weapon systems, FN Herstal develops the complete integration of the system together with the platform manufacturer (OEM) or directly with the end user, supervises the installation of all its products, offers operator and armorer training and provides high quality after-sales services to meet customer requirements.

FN Herstal's pintle weapon systems for naval applications are equipped with a .50 cal or 7.62mm machine gun.
